NEW BOOKS

THE DECREASING FERTILITY OF WESTERN SOIL, By L. F. Butler. 39 p. 1949 56.6 B97
Describes some specific soil conditions existing in the irrigated and dry-land areas of the Rocky Mountain Region and gives suggestions for dealing with them. Emphasis is placed on the translocation or movement of lime by water and the resultant effect upon soil fertility.

GRASS SILAGE AND DAIRYING, By R. E. Ingham. 88 p. 1949 389.7 In4
This volume is packed with practical information. Emphasis has been placed on grass silage but there is also data on related subjects so that the whole picture of grassland farming, particularly under humid conditions is covered. The book will prove helpful to FHA and SCS personnel in their daily contacts with farmers.

GREAT PLAINS COUNCIL. PROCEEDINGS, August 11, 12, 13, 1949. 126 p. 282.9 G7992
Partial contents.- Impacts of prospective changes in demand for wheat on Great Plains wheat areas, by H. L. Steward.- Crop substitutes -- comparative yields, soil depleting and soil building aspects, by D. W. Robertson.- Place of fallow in Great Plains land use adjustment, by M. A. Bell.- Establishment of permanent cover, by F. J. Sykes.- Costs of transition from wheat to grass, by O. J. Scoville.- Classification of land according to sensitivity to erosion, by H. H. Finnell.- Long-range weather forecasting, by D. A. Dobkins.

MAN ON THE LANDSCAPE: THE FUNDAMENTALS OF PLANT CONSERVATION, By V. G. Carter. 129 p. 1949 279 C24M
Writing for the agriculturist, the forester, gardener, nature lover, sportsman, but particularly for the teacher and student of plant life, the author emphasizes the importance of plants en masse as a factor in the welfare of man; points out social and personal problems arising from deficiencies in the quantity and quality of vegetation; sets forth management principles by which man can ease many of his troubles and avoid others, and finally suggests how young people may be made aware of the great part vegetation will play in their life.

SOIL SCIENCE SOCIETY OF AMERICA. PROCEEDINGS. Volume 13. 1948 56.9 So3

SOILS: THEIR PHYSICS AND CHEMISTRY, By A. N. Furi. 550 p. Reinhold 1949 56.4 P97
The author, trained in classical chemistry, conceives of the soil, when freed of extraneous matter, as an acid the hydrogen of which constitutes an integral part of the hydrated ferroaluminosilicates. The book is divided into three parts: The chemistry of the soil; mechanical analysis of soils; and soil moisture. The discussion is highly technical.

THE WORLD WAS MY GARDEN; TRAVELS OF A PLANT EXPLORER, By D. G. Fairchild. 494 p.
Scribner 1947 452.9 F16W

Autobiography of the well-known botanist and plant explorer who from 1906 to 1928 was head of the Division of Foreign Plant Exploration and Introduction of the USDA. The book is filled with tales of his explorations all over the world in search of exotic fruits and flowers. Interesting to the non-scientifically trained reader as well as to the scientist.

?HAVE YOU READ THESE?

A Dozen Books From Our Bookshelves on Soils, Fertilizers and Related Subjects

ARTIFICIAL MANURES Beaumont 1943 57.4 B38

Gives particular attention to the preparation and use of artificial manures, including cover crops and green manures.

CHEMICALS, HUMUS AND THE SOIL Hopkins 1948 57.4 H77

The author presents "The Case For Fertilizers" and "The Case Against Fertilizers" and summarizes the controversy between the organic compound school and the chemical fertilizer proponents.

COMMERCIAL FERTILIZERS Collings 4th Ed. 1947 57.2 C69

A standard work on the sources and uses of fertilizer raw materials and the production and use of manufactured mixed fertilizers.

DIAGNOSTIC TECHNIQUES FOR SOILS AND CROPS Bear 1948 395 B38D

Concise discussion of the fertility levels of soils and the nutritional requirements of crops.

ELEMENTS OF SOIL CONSERVATION Bennett 1947 56.7 B43E

The author has drawn upon his many years' experience and results of the Soil Conservation Service to present a comprehensive text on methods and techniques involved in modern soil conservation.

FARM SOILS: THEIR MANAGEMENT AND FERTILIZATION Worthen 4th Ed. 1948 56.7 W89

Phases of soil management are treated in relation to the economic production of crops and on the permanency of the soil itself.

GROWTH OF PLANTS Crocker 1948 463.36 C87

A critical summary of researches carried on at Boyce Thompson Institute. The volume is largely devoted to physiological aspects.

HANDBOOK OF FERTILIZERS Gustafson 4th Ed. 1944 57 G97

Special stress is laid on the effects of fertilizers on soils and crops to aid the user in making a wise choice for his individual soil and cropping conditions.

HUMUS AND THE FARMER Sykes 1946 57.4 Sy4

The author maintains that the approach to soil problems should be biological rather than chemical.

PLANT GROWTH Yocum 1945 463 Y7

Easily understood illustrations, supplemented by clearly phrased comments, allow the reader to acquire a vivid picture of plant growth by watching his own flower or vegetable garden's progress.

THE RESPONSE OF CROPS AND SOILS TO FERTILIZERS AND MANURES Andrews 1947
57.07 An2

TRACE ELEMENTS IN PLANTS AND ANIMALS Stiles 1946 395 St5

A digest of experimental work on trace elements in the life of plants and animals carried out in the field and in the laboratory.

PERIODICAL NOTES

Several USDA friends of the Library are sending us current issues of agricultural periodicals. These are greatly appreciated since they help to speed up circulation. If you are receiving agricultural magazines which you discard after reading please send them to the Library, we can make good use of them.

The titles listed below have been added to our periodical list. If you are interested in having any of them routed to you regularly please notify the Library.

IOWA FARM SCIENCE Monthly

Current information on agricultural and home economic subjects from the Iowa Extension Service and Agricultural Experiment Station.

THE QUARTERLY BULLETIN

Published by the Michigan Agricultural Experiment Station.
Presents: 1) Progress reports on long-term major research projects; 2) Final reports on short-term projects and 3) Short, timely articles of a popular nature on a variety of agricultural subjects.

QUARTERLY REVIEW OF RESEARCH

Reports on research in progress at the Rhode Island Agricultural Experiment Station.
